Professional Summary

Resourceful and continuous-learning Junior Developer with a strong focus on building robust applications and optimizing technical environments. Proficient in Python, Java, C, and SQL. A self-starter with a proven ability to independently troubleshoot systems and a demonstrated track record of strong communication and project management through digital content creation.

Technical Skills

- **Programming Languages:** Python, Java, C, SQL
- **Operating Systems:** Linux (Mint XFCE), Windows
- **Tools & Methodologies:** Git, GitHub, Object-Oriented Programming (OOP)

Projects

- **Nothing finished as of yet but working on my portfolio website a and Koko web app while still studying for other Certificates like aws Ai practitioner and aws data engineering**

Experience & Professional Development

Development Environment Optimization | *Independent Project*

- Transitioned primary development environment from Windows 10 to Linux Mint XFCE on a Proline machine to establish a lightweight, developer-centric workspace.
- Navigated OS installation, partition management, and software configuration, demonstrating adaptability and a strong curiosity for system administration.

Podcast Host & Producer | *2026 – Present*

- Manage end-to-end production of a podcast, including structuring episodes, researching topics, and coordinating guest appearances (e.g., organizing and conducting a featured interview with Rody Preddy).

- Develop strong communication, interviewing, and planning skills, which directly translate to effective cross-functional collaboration and clear documentation in technical environments.

Education

NQF Level 6 Occupational Certificate in Software Engineering | *WeThinkCode_*

December 2026 (Expected)

National Senior Certificate / NQF Level 4 | *William Hills Secondary School*

November 2016
